re: Docket No. 98N-1265

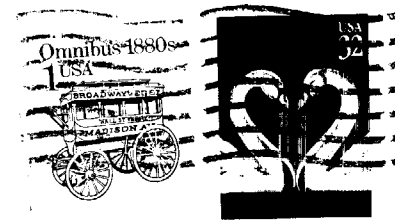

To Whom It May Concern:

I am strongly opposed to the Draft Memorandum currently being circulated by you to state pharmacy boards. This is just yet another oppressive and unnecessary attempt to restrict our access to compounds made by specialized formulary pharmacies. The definition of "inordinate amount" is especially obnoxious. There is no medical need for this limitation. Specialized compounding pharmacies do not need any more regulation than they already have. They make up compounds to doctor's prescriptions, and they supply a very real need for people who have a particular requirement, and there is no need for national control of how much anyone orders or receives. Since many of us live in remote areas, sometimes our only access to these life-saving compounds is by mail order, across many state lines, and so what? Please just tear up this ill-conceived "Draft Memorandum" and stop trying to interfere with our right to manage our own health with the doctors and pharmacists of our own choice.
